

## EVERGREEN TREES 2021

### Picea abies

**Norway Spruce** Zone 2. 80-100 ft. 30-50 spread. Rapid grower. Excellent for screening or specimen plant in landscape.

### Picea glauca 'Densata'

**Black Hills Spruce** Zone 2. 20-40 ft. Slow grower. Much denser and more ornamental than the White Spruce. NATIVE

### Picea glauca

**White Spruce** Zone 2. 40-60' tall and 20' wide. Highly regarded for landscape use. Can take moist soil and handle high winds. Faster grower than Black Hills. NATIVE.

### Picea pungens glauca

**Colorado Blue Spruce** Zone 3. 60 ft. 20-25 ft. spread. Best known in spruce family for its hardiness and bluish color. NATIVE to southwest US.

### Picea pungens 'Baby Blue'

**Baby Blue Spruce** Zone 3. 60' high x 15' wide. Chosen for its blue needles. Blue intensifies with age. Uniform growth that never needs pruning. NATIVE to southwest US.
